

Exercise 5 (answers on page 41)

Add or subtract the following mixed numbers. Simplify and reduce when possible.

$$1) -8\frac{4}{5} + 8\frac{1}{10} =$$

$$2) 1\frac{2}{3} + \frac{-3}{7} =$$

$$3) 16\frac{5}{8} + \frac{11}{12} =$$

$$4) 3\frac{4}{5} + 6\frac{2}{3} + 5\frac{11}{15} =$$

$$5) -1\frac{11}{12} - \frac{-2}{3} =$$

$$6) -4\frac{1}{8} - 1 =$$

$$7) 5\frac{1}{6} - 2\frac{1}{3} =$$

$$8) 14\frac{1}{2} - 2\frac{1}{8} =$$

$$9) -7\frac{2}{5} + 1\frac{1}{5} =$$

$$10) -2\frac{2}{3} - \frac{-1}{4} =$$

$$11) 12\frac{1}{7} - 8\frac{2}{3} =$$

$$12) 4\frac{4}{7} - 3\frac{6}{7} =$$

$$13) 16\frac{5}{6} - 2\frac{1}{3} =$$

$$14) 14 - 2\frac{1}{9} =$$

$$15) 146 + 8\frac{1}{5} =$$

$$16) 5\frac{5}{6} + \frac{10}{12} =$$

$$17) 6 - 4\frac{7}{8} =$$

$$18) 11\frac{3}{5} - 5 =$$

$$19) \frac{2}{3} + 7 =$$

$$20) 2\frac{4}{8} + 1\frac{2}{3} =$$

$$21) 100 - 4\frac{3}{8} =$$
